Suppose a school is think about building a new lab or a new theater. The science faculty would like for a new lab to be built. The theater faculty would like for a new theater to be built. The funding for the project is contingent on unanimous support from the faculty. If there is a disagreement, neither project is built, which is each faculty group's worst outcome. The meetings of the two separate faculty groups on which proposal to support occur at 4:00 pm in separate rooms.
